Detailed Action

Allowable Subject Matter

1. Claims 1-9 are allowed.
2. The following is an examiner's statement of reasons for allowance:

With respect to the independent claim 1, prior art fails to disclose or make obvious, in addition to the accompanying features of the claim, an electron projection lithography apparatus using secondary electrons, the apparatus comprising: a secondary electron emitter, a primary electron emitter which is spaced apart from the secondary electron emitter in a direction opposite to the substrate holder and emits primary electrons to the secondary electron emitter, and a magnetic field generator which controls paths of secondary electrons emitted from the secondary electron emitter.

The dependent claims 2-9 are allowable by virtue of their dependence upon the independent claim 1.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. McClelland et al. (2004/0061432 A1) disclose an emission device which includes a plurality of electron emitter structures of varied geometry that have a conducting layer deposited thereon.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
